CIRCUS

Floribunda Roses

THEY BLOOM ALL SUMMER

As Specimens, Group Plantings or Hedges, they have no equal and they are good as cut flowers, too

These are bushy plants producing clusters of bloom without interruption from early summer until late frosts. They are all very easy to grow and exceptionally hardy. Besides using them informally in beds, plant Floribundas in the foreground of shrubs and as hedges.
Set Floribundas 18 to 24 inches apart. They grow 2 to 3 feet tall.

BETTY PRIOR. Tall and very free flowering from spring to frost. The buds are a lively red, opening to single blooms of shell-pink, resembling red dogwood. \$1.50 each.

CHINA DOLL. Plant Pat. 678. Fragile as a doll of china, and one of the very few low-growing, bush-type Floribundas. This plant literally covers itself with tiny pink rosebuds, making a solid mass of color. \$2.25 each; 3 or more, \$2.00 each.

CIRCUS. Plant Pat. 1382. Buds show tones of yellow, red, pink and orange, and open to even brighter hues with yellow predominating and bright, deep pink staining the edges of the outer petals. Full blooms are 3 to 3½ inches across, with 25 to 40 neat, firm petals. Compact, 2½-foot plant. \$2.50 each; 3 or more, \$2.20 each.

COCORICO. Plant Pat. 1193. A blaze of poppy-red blooms, to illuminate your garden. Clusters of small, velvety-petaled flowers with 5 to 9 petals. Bushy and upright. \$2.00 each; 3 or more, \$1.75 each.

FASHION. Plant Pat. 789. Sparkling coral-pink suffused with gold. Delicately fragrant. \$2.00 each; 3 or more, \$1.75 each.

FLORADORA. Dazzling cinnabar-red flowers produced in profusion on a neat, 2½-foot bush. \$1.50 each.

FRENSHAM. Vigorous and tall growing. Deep un-fading scarlet. \$1.50 each.

FUSILIER. Plant Pat. App. for. Dark red buds open slowly to 3-inch flowers of bright orange-scarlet, with about 40 ruffled petals. Excellent growth and blooming habits. Fragrant. (See front cover.) \$2.50 each; 3 or more, \$2.20 each.

GARNETTE. A much-desired small red cluster Rose. Low-growing. Lovely for bordering Rose beds. \$1.75 each; 3 or more, \$1.50 each.

GEORGE ELGER. Small buds, changing from copper to clear yellow. Very double flowers in large clusters; tea fragrance. Profuse bloom. Foliage small, light green. A delight for borders. \$1.50 each.

GOLD CUP. Plant Pat. App. for. A large, deep yellow Floribunda distinguished for vigor, size, form and productiveness. Pointed buds open to 3-inch, non-fading blooms with sweet fragrance. Sturdy, 2½-foot plant. (See front cover.) \$2.50 each; 3 or more, \$2.20 each.

JIMINY CRICKET. Plant Pat. 1346. A pert new color in Floribundas—tangerine-red in the bud, becoming coral-orange as it opens. Pleasing old Rose fragrance. Glossy, bronzy foliage. \$2.00 each; 3 or more, \$1.75 each.

LITTLE DARLING. Plant Pat. 1581. Originated by Duchsen, introduced by Elmer Roses, and distributed by CARROLL GARDENS. NEW! The warm sunset coloring of a summer sky, with varied hues from the lurid red-orange on the outer circle, changing to shades of rose-pink, finally melting into warm buttercup-yellow at the heart. This is the thrill one feels when looking into the heart of Little Darling, a small, 2½-inch bloom of near perfection in form and glorious blended colors. These blooms are borne both singly and in clusters on long stems. A 2 to 3-foot, bushy plant with disease-free, shiny green foliage. Dainty perfume adds luster to the Rose. The buds are created for corsages and boutonnieres and last well when cut. (See front cover.) \$2.00 each; 3 or more, \$1.75 each.

MA PERKINS. Plant Pat. 1143. Sparkling salmon-shell-pink. Ovoid buds and good-sized, well-formed flowers with pleasing fragrance. 2½ feet tall. \$2.00 each; 3 or more, \$1.75 each.

No doubt, of course, that these varieties will show some variations in color; therefore, the plants offered are not guaranteed as to color, but we can assure you that whatever color you get, it will be fascinating and most beautiful. 3-yr.-old, transplanted plants, 10 to 12 in. high, \$2.35 each; 2 for \$3.95; 4 for \$7.25; 12 for \$19.75.

Showy, Large-Flowering Clematis

A partially shaded location suits Clematis best. If it is grown in the sun, a few small plants to shade the lower stems and roots will help to keep the ground cool and moist. A summer mulch of peat moss or spent hops may be used to advantage. Clematis thrives best in well-drained, rich garden loam of rather light texture. Sand and peat moss may be mixed with heavy soil to loosen it, and a little lime should also be added. Set the collar of the plant at least 2 to 3 inches below the surface of the soil. Firm the soil well around the roots, and water thoroughly.

A PLAN FOR A PERENNIAL BORDER

A simplified plan to fit your space, your location and your pocketbook. An exclusive and original idea of Carroll Gardens to help you have a beautiful perennial border at reasonable cost and with minimum care. Read it carefully and decide on the group that fits your purpose best. If you are planning a formal garden, a straight-line border fits best into your scheme. But if you are trying for an informal effect, a curved border will be better. A perennial border is always best planted along a dividing line, along a picket fence or in front of shrubbery. It is never advisable to put it in the middle of the lawn. The length as well as the width depends on the space that you have available.

THE PERENNIAL BOOKLET OFFERED FREE ON OUR ORDER SHEET WILL GO INTO MORE DETAIL REGARDING THE PLANTING OF A PERENNIAL BORDER. YOU WILL FIND IT HELPFUL.
If this plan doesn't suit you, why not lay one out for yourself? You'll have lots of fun doing it.

A Keyed Plan for your convenience. A Perennial Border showing the effective use of Summer Phlox. See page 22 for varieties.

PLEASE READ CAREFULLY. Here is how the plan works: If you want to use only 24 plants, these will be enough for a bed 8 feet long and 3 feet wide, using one plant for each space provided as keyed. If you want to make the bed 16 feet long and 3 feet wide, use 48 plants, or 2 for each space. If you want to make the bed 24 feet long and 3 feet wide, use 72 plants, or 3 for each space. However, if you have the space and want a really spectacular and colorful border, make the bed 30 feet long and 5 feet wide. Put 6 plants in each space as keyed, and set them about 12 inches apart.

- The red mark indicates where groups of spring-flowering bulbs such as tulips, daffodils, hyacinths, crocus, etc., may be planted to brighten the border in very early spring. Peonies, iris and Oriental poppies may be planted where the letters appear.

Hardy PERENNIAL PLANTS

All over America perennials have their place in sun and shade. A source of color and fragrance in the garden, they also provide an abundance of cut flowers for our homes. In modest dooryards, in large gardens and in city parks, perennials are an important part of the landscape.

In contrast to annuals whose life cycle consists of one year from seed to seed, perennials live on for several years or longer, depending on the care they get.

Many of the hardy perennials we grow today are native to our own country, and many more have been introduced from other lands. All are adaptable in some way to American gardens. We soon learn to know those that flourish in partial shade, in full sun, in wet places or in hot, dry areas. It is possible to find plants to fit almost any situation.

Modern gardens are usually comparatively small in size. As a result every gardener is challenged to make the most of his plot of ground. Think of perennials as a part of your outdoor living-room—the plant materials which help to complement its color scheme, furniture and decoration.

We are anxious to help you enjoy the finest perennials available in order to make your garden more colorful and more interesting. Production of perennials has been our main endeavor at Carroll Gardens from the very start 25 years ago, and each year we produce well over half a million plants to serve our many thousands of customers throughout the United States and Canada.

If you will check from page 16 through page 32 you will see listed, described and illustrated one of America's finest collections of perennial flowers suitable for almost any situation that may arise.

If at any time we can be of help in supplying you with information on perennials as well as other nursery stock, please do not hesitate to consult us.

CARROLL GARDENS

FINEST HARDY MUMS

Hardy Chrysanthemums are among the most dependable flowers in the autumn garden, providing glorious color and spicy fragrance from early September (August with some varieties) until heavy frost.

There are Chrysanthemums of many types, from the Cushion Mums for low mounds of color in borders and rock gardens, to the long-stemmed kinds for cutting.

We feel that we have one of America's finest and most up-to-date Chrysanthemum collections. Our list includes selected varieties from the best Chrysanthemum specialists in the country, including some of our own introductions and the new imported Super Giant English varieties.

Due to lack of space, we are listing only the most important varieties that we have. Many other sorts are available. Write us if you are interested in them.

CULTURE. Chrysanthemums will grow in any good average garden soil which has been enriched with manure or good commercial fertilizer. Plant them 15 to 18 inches apart. Cultivate the soil between them, particularly while they are in the young stage. You can pinch the plants up to July 15 if they are tall and spindly. Don't pinch any more after that date. Hardy Chrysanthemums do best if grown in full sun. If they are planted in the shade, they will grow too tall, have weak stems, and produce inferior blooms.

ARTIST'S DELIGHT

The 4 All-America MUMS for 1958

CARROLL GARDENS has always been among the very first few to offer new and unusual hardy plants and bulbs to the American gardener. This year, in addition to the many new perennials, roses, shrubs and flowering trees listed throughout the catalog, we have the privilege and pleasure of offering the magnificent NEW ALL-AMERICA HARDY CHRYSANTHEMUMS. We appreciate being one of those selected to introduce them.

These varieties have been tested for several years under varying conditions in different localities. Through these tests, they have been judged outstanding in every way and have been selected as the All-America Winners for 1958.

Carroll Gardens joins with others in extending best wishes for future success to the hybridizers. Without these dedicated, untiring personalities to provide us with new plants every year, our gardens would not be nearly so beautiful or interesting.
